AFFORDABLE CEUs

COMPREHENSIVE PROGRAMS

Real Patients. Real Issues. Real Solutions.

Packed with Treatment Ideas

Treatments on DVDs

Comprehensive Workbook

Feels Like Being in a Course

Extensive Practical Labs

Complete Assignments

Here's How it Works:

- ◆ View the patient treatments on DVDs
- ◆ Complete all assignments
- ◆ Complete all practice labs
- ◆ Take exam, earn a passing score
- ◆ Receive a certificate for 15 Contact Hours

Benefits:

- ◆ Improve your clinical skills
- ◆ Yours to keep for future reference
- ◆ No expiration date
- ◆ Fits any schedule

3 Courses to Choose From:

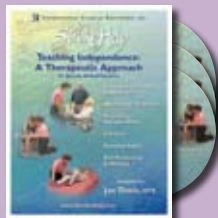

Treatment Strategies in the Acute Care of Stroke Survivors

Clear, concise strategies for assessment and treatment of low-level patients filmed in the hospital setting.

Functional Treatment Ideas and Strategies in Adult Hemiplegia

Improve patient outcomes with functional tasks taken from real-life combining Motor Learning Theory and NDT principles.

Teaching Independence: A Therapeutic Approach to Stroke Rehabilitation

In-depth practice labs on mobility and self-care demonstrate essential clinical skills for therapists treating stroke survivors.

Jan Davis, MS, OTR/L

Jan Davis, MS, OTR/L is an internationally recognized leader in providing clinical training for therapists working in stroke rehabilitation. Her teaching style is highly effective as she skillfully combines Motor Learning, NDT and Motor Control theory. Complex principles are easy to understand as she provides dynamic clinical application.

With an emphasis on evidence-based practice, Davis completed her MS degree in Rehabilitation Science in 2007. Her work was recently published in *Topics in Stroke Rehabilitation*. In addition to workshops for PTs and OTs, she has also presented at the American Congress of Rehabilitation Medicine, the American Society of NeuroRehabilitation and the American Academy of Neurology.

"I would like to applaud you for putting together a first rate home study CEU program. These are by far the best 'at home' courses that I have ever taken. I am the owner of a therapy company employing 30 PTs, PTAs, OTs and OTAs. I will strongly encourage, if not mandate, the completion of your courses based on their organization, content and simplicity of use."

— **James Lauder, MPT**
President, CEO
Foundation Rehabilitation, Inc.

CEUs for PT

PTs in all states can earn CEUs. Our programs have been pre-approved by the state PT Associations and Licensure Boards including: AL, AK, AR, AZ, CA, DC, DE, FL, GA, ID, IL, KS, KY, LA, MD, MN, MT, MO, MS, NV, NY, OH, OK, PA, SC, TN, TX, WV, and WI.

Our list of approved states is continually being updated. For the latest information on approval status go to www.ICELearningCenter.com

CEUs for OT

International Clinical Educators is an Approved Provider of the American Occupational Therapy Association

Therapists are responsible to contact their own state board for verification of CEU approval.

Treatment Strategies in the Acute Care of Stroke Survivors

This course is perfect for therapists working with low-level stroke survivors. Follow physical therapists and occupational therapists as they work with stroke survivors, just days post stroke, beginning bedside and progressing to functional tasks in standing.

Excellent guidelines are provided for assessment and intervention strategies in the acute care setting. Treatment methods are supported with evidence-based practice.

Observe as the medical director leads the stroke team at a nationally certified stroke center of excellence, rated one of the top 100 hospitals in the nation.

Features:

- ◆ Evidence-Based treatment strategies in early intervention
- ◆ Specific handling methods for functional mobility and self-care
- ◆ Dealing with complex monitoring equipment in the ICU
- ◆ Protocols for aspiration precautions
- ◆ Discharge planning

Includes:

- ◆ 4 DVDs of Actual Patient Treatments
- ◆ Comprehensive Workbook
- ◆ Practice Labs
- ◆ Written Assignments
- ◆ Competency Exam
- ◆ Certificate of Completion for 15 Contact Hours

Train Additional Staff

With the purchase of *Treatment Strategies in the Acute Care Stroke Survivors*, an unlimited number of therapists can earn 15 contact hours.

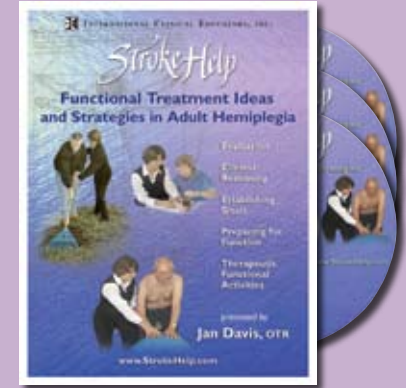

Order one CEU package per therapist
 CEU Packages: \$95 each
 Includes: Workbook, Exam and Certificate

Functional Treatment Ideas & Strategies in Adult Hemiplegia

Jan Davis skillfully demonstrates how to use functional activities taken from real-life situations to improve upper and lower extremity function with actual stroke survivors.

This course combines Motor Learning Theory with handling methods based on NDT principles that can be used in any treatment setting.

A 'must have' for occupational therapists and physical therapists working in stroke rehabilitation.

Features:

- ◆ How to select functional tasks designed to individual patient's needs
- ◆ How to prepare the patient for function
- ◆ Facilitation methods for improved trunk and limb control
- ◆ How to select tasks to improve functional standing
- ◆ How to write treatment goals with functional outcomes
- ◆ Methods to decrease UE pain and swelling

Includes:

- ◆ 3 DVDs of Actual Patient Treatments
- ◆ Comprehensive Workbook
- ◆ Practice Labs
- ◆ Written Assignments
- ◆ Competency Exam
- ◆ Certificate of Completion for 15 Contact Hours

Train Additional Staff

With the purchase of *Functional Treatment Ideas & Strategies in Adult Hemiplegia*, an unlimited number of therapists can earn 15 contact hours.

 CEU Packages: \$95 each
 Includes: Workbook, Exam and Certificate

Teaching Independence: A Therapeutic Approach to Stroke Rehabilitation

Jan Davis demonstrates clear, concise step-by-step handling methods to improve functional mobility and self-care with actual stroke survivors requiring moderate and maximum assistance.

More than 40 practice labs are included on Transfers, Self-Care, Preventing Shoulder Pain, Improving Function and Awareness, Standing Safely and Bed Positioning and Mobility. *Definitely feels like being in a workshop!*

Teaching Independence provides the foundation for the therapeutic methods demonstrated in all of our programs.

Features:

- ◆ Examples of wheelchair transfers (bed, car, sofa and high hospital beds)
- ◆ Facilitation of trunk and limb control during bed mobility
- ◆ Methods to improve the functional potential of the involved side
- ◆ Tips to improve body mechanics to decrease staff injuries
- ◆ Home exercises for stroke survivors
- ◆ Specific handling methods to prevent shoulder pain

Includes:

- ◆ 3 DVDs of Actual Patient Treatments
- ◆ Comprehensive Workbook
- ◆ Practice Labs
- ◆ Competency Exam
- ◆ Certificate of Completion for 15 Contact Hours
